

Intero-The Sniffers is an independent service provider that identifies current and future losses of pipelines and installations in the oil and gas industry, advises on how to reduce emissions and energy losses and how to maintain the integrity of a pipeline network.

Intero-The Sniffers has an important international client portfolio and provides its services mainly in Europe and the Middle East.

For our office in Ploiesti, Romania we are currently looking for a M.

Field Operator International Projects

Assignment:

The Field Operator is performing emission measurements on the plants of our customers.

Our staff typically is working in small team under the supervision of a Project Leader.

With a variety of specialised equipment the teams are executing measurements on emissions and energy losses. The collected data are prepared and transferred for further analysis and reporting.

The team is working for periods of several weeks or months on the site of our international customers ; Europe and the Middle East are our dominant markets.

- You execute measurements at the Oil and Gas installation of the customer with the expected quality while respecting the safety regulations of the site.
- You identify, inventorize and measure emission data for different emission sources
- You are responsible for the regular calibration of your equipment and take good care of the measuring equipment
- You meet daily the operational performance standards in safety, quality and output

Profile:

- Qualified candidates should have a **technical background** and enjoyed a technical education (bachelor degree). Basic knowledge of chemistry and oil and gas pipelines is a real asset.
- The position requires significant **field work**.
- **Candidates are willing to travel** and to stay and work abroad for periods varying from 1 to 8 weeks : the majority of work is performed at plants and platforms across Europe, the Middle East
- Candidates are **physically in a good condition** : you must be able to lift and carry loads, climb ladders, and be comfortable working outdoors and at heights; typically work takes place on an elevated stack platform. Personal protection equipment is used (e.g., hard hat, safety glasses, steel toe boots, fireproof clothing).
- Candidates have **good communication skills**
- Show **positive work attitude** and can work **autonomously** within the frame of company's guidelines and code of conduct
- Show moderate **computer skills**. You learn quickly to work with measurement protocols and (new) devices, internal customer regulations, procedures, instructions and new legislation and norms.
- Are **adventurous** and like to work in a **multicultural environment**
- Are **flexible** : you can deal with difficult situations and changing conditions.
- Are **hands-on** and **pragmatic**
- Speak **English** well
- Having a **driving license** is mandatory.

We offer

- An interesting and challenging international work environment in a focused and ambitious company with a track record in its sector
- Opportunities for personal development and growth
- You will be part of a young and supportive team
- A competitive market remuneration package with additional legal benefits such as pension and hospitalisation insurance
- A congestion-free working environment

Please send applications with a C.V. and motivation to wim.daems@intero-integrity.com, madalina.bibiricea@intero-integrity.com.

Project Preparation & Reporting Specialist

Job Description:

You are involved from A to Z in setting up, preparing and reporting on measurement projects at customers. This includes:

- Collecting the necessary information for the project-specific preparations: measurement plans, available products, ...
- Setting up and maintaining a specific database per customer using in-house developed software
- Processing the measurement data delivered by the project leader
- Performing checks on the various measurement and project data
- Preparation of reports: enter the processed data into standard templates and provide the necessary comments
- Consultation with clients on measurement results, conclusions and actions to be taken

In your versatile role, you prepare projects in terms of content and practicality, you coordinate well with the planner and the sales manager, you process data in reports; all this in close cooperation with a small team of reporters, preparers and planners.

Profile:

- You have completed a higher education type bachelor (or equivalent level through experience)
- Background knowledge or affinity with production environments (in petrochemicals; oil and gas industry ...) are an added value
- You are an experienced computer user: you have excellent knowledge of Excel, databases and software applications.
- You know several languages both orally and in writing: you use English on a daily basis. Knowledge of French, Italian, German, Arabic, Spanish ... are pluses)
- You are strong in time management and can work independently and on a project basis.
- You are customer-oriented and a good communicator
- You like to work in a small close team
